(54) Title: NOVELTY ITEM

WO 03/103791 A2

(57) **Abstract:** A spinning top has a body (1) and a stem (2), whereby the stem (2) is movable between a first position in which it lies substantially parallel to the body (1) and a second position in which it extends through an opening (5) formed in the body (1). Preferably, when the stem (2) is in the first position it is carried on or in the body (1).
